From Elton John and the RD-1000 back in the 1990's to today's artists like Daniel Powter (#1 Hit "Bad Day"), the amazing RD Series allows thousands of the most successful and well known Music Professionals and Celebrities continue to help make *Roland RD Pianos* the world's #1 Stage Pianos

Our Top 3 Concert Grand Piano samples!

- The new 88-Key Sampled Pianos make you sound like you're playing a \$100,000 Concert Grand Piano.
- Quick and Responsive "Grand Piano feel" Hammer Action and IVORY FEEL Keys.
- Keys feature moisture absorption technology for no slipping under hot lights.
- Great Sound from TWICE as much WAV ROM memory as the RD-SX series.
- The "Piano Designer" allows you to tweak your GRAND Piano sound to PERFECTION.

SuperNATURAL Electronic Piano Tones Built-In

- **Customize your E.P. Sounds like NEVER before on ANY piano!**
- 10 SuperNATURAL E.P. Tones built-in - no ARX board needed.
- SuperNATURAL engine actually interprets LIVE input from the players HANDS for amazingly accurate, seamless EP sound.
- **E. Piano Designer** lets you switch amps, mic distance, bell type, etc.

USB Host Port for Audio Tracks and SMF Song Files

- Jam with your favorite Audio tracks LIVE with a USB Memory Key.
- Playback .WAV, .AIFF, .MP3, and .SMF; and you can adjust EQ too.
- Transpose, Center Cancel and Time Shift AUDIO and MIDI.
- Listen to .SMF data using built-in high-quality GM2 sound set.

THE Ultimate Performance Piano

- AUDIO KEY feature for triggering up 15 Audio Files live...
- Four zone faders and External/Internal button for live Master Control.
- 4-band Digital Equalizer control knobs on panel.
- Create your own "setups", and then save to a USB Key for instant recall anywhere.
- 148 Arpeggiator styles / 205 Rhythm patterns
- Full Tone-wheel Organ built-in with faders to use as adjustable Tone-bars.
- Comes with SONAR LE from Cakewalk by Roland.

SRX Expansion

- Two SRX expansion slots for using any of Roland's 12 SRX wave expansion boards.

Awesome Action! Roland's new PHA II - IVORY Feel

First, turn the power off to check out the touch:

- When you press down the lowest keys on the keyboard you'll notice it's **HEAVIER** than the upper part of the keyboard just like on a \$100,000 Grand Piano!
- This **GREAT** Technology makes for the **MOST** incredibly accurate "GRAND PIANO" feel!
- Check out the tops of the keys and the Ivory and Ebony feel! On old acoustic pianos, Ivory allowed for a steadier grip on the keys. Plastic is slippery. "Ivory Feel" allows for a steady grip when your hands sweat **AND** they're anti-bacterial and **VERY Durable!**

Three 88-key Stereo Multi-Sampled Grand Piano Sounds

NOW, turn **ON** the power to **HEAR** and **EXPERIENCE** the **GREAT** piano sounds!

1. **The RD-700GX "powers on" to a Grand Piano automatically!** (Piano A, **Expressive Grand**)
Play the brand new, exciting, bright and "alive" piano sound.
2. **PRESS** the "DEC" and "INC" buttons above the wheel to raise and lower the lid of the grand piano.
3. For another grand piano, press the F1 button "TYPE" below the screen for **Expressive Grand**.
4. For the third grand piano, press "TYPE" again to try **Ultimate Grand** (for the RD-700SX fans).
5. **PRESS F2 - "DESIGNER" -** (below the screen) to access the Piano Designer menu. Check out the parameters that can be adjusted. Use the right/left/up/down buttons around the wheel to access different pages and functions. Turn the wheel to adjust the sound.
6. Press the "EXIT" button to the lower left of the wheel to return to the main page.

"TIP" You can always hit the ONE TOUCH PIANO button from any page to return to PIANO!

SuperNATURAL EP Tones Built-In

1. **PRESS** One Touch E. PIANO (for quick access to 3 top variations)
2. **Tine E. Piano** is choice "A". It is a Rhodes-like sound.
3. **PRESS F1 "TYPE"** just below the screen for the **Wurly E.P.** Play it soft, then increase slowly to hard. You'll notice the smooth and authentic transition in tone as you play it harder.
4. **PRESS F1 "TYPE"** again to get the next E.P., "Dyno E. Piano." A more '80s sound.
5. **PRESS F2 "DESIGNER"** for the E. Piano Designer menu. Use the right/left/up/down buttons around the wheel, and turn the wheel to edit the sound to your liking.

AUDIO KEY

Play along with **YOUR** favorite **AUDIO LOOPS** (.WAV, .MP3 or .AIFF files).

1. **PRESS** the **AUDIO KEY** button on the right hand side of the panel.
2. The bottom 15 keys become Audio Files that you trigger directly from the keyboard.
3. Listen to the built audio demos by pressing lowest "B note" key.
4. Watch the screen for a demo subject and countdown during the audio explanation.
5. When the file stops, press the next key up. The last demo is found on the lowest F#.
6. You can stop the demos at anytime by pressing the lowest "A note" key.
7. The last four keys (G# thru B2) are "Jam-Along" audio files. These are real audio loops you can jam along with simply by pressing the keys at any time.
8. You can create your own audio loops by using the included version of Cakewalk by Roland's SONAR LE
9. You can then create your own Audio Key files by using the free utility Audio Key software included with the RD-700GX.

"TIP" The RD-700GX has a USB Host Port for connecting a USB Memory Key. This memory key can hold Audio Files (.WAV, .MP3, .AIFF) and SMF as well as Audio Key files and your favorite setups.
